Pellevé™ and Your Practice:

Creating revenue with the latest innovation in skin tightening

pellevé™
Elegance through science.

**Saturday,
12 September 2009
Trier, Germany**

**Transportation provided from Frankfurt
International Airport**

Course Description:

This one-day course provides a comprehensive review of the science behind Pellevé™ and how the Pellevé Skin Tightening System can be incorporated into the physician's practice. Discussion includes clinical instruction on using the system, why Pellevé benefits patients and how physicians can generate new and continuing revenue with the addition of a skin tightening program.

The course is comprised of didactic and clinical sessions detailing basic radiofrequency technology, principles applied to skin tightening, indications for the procedure, patient selection, equipment and personnel requirements, and facility integration. The clinical sessions also include protocol and technique review, demonstration, and live cases.

Objectives:

- Understand the basic principles of radiofrequency technology
- Know the indications for skin tightening
- Identify patients who may benefit from the procedure
- Demonstrate proficiency in protocol and technique
- Integrate skin tightening into practice and understand the potential for revenue

Target Audience:

Physicians, nurses, and aestheticians performing cosmetic treatments

Faculty:

Dr. med Kai Rezai
Dermatologist and European Training Director
for Pellevé™
Münster, Germany
